## SAFETY TIPS.

### READ ALL INSTRUCTIONS AND SAFETY INFORMATION CAREFULLY BEFORE INSTALLING YOUR FIXTURE AND SAVE THESE INSTRUCTIONS.

**WARNING:** To reduce the risk of electric shock, DO NOT use the product if power cord is frayed or broken.

DO NOT use bulbs having a wattage greater than the maximum value stated on the fixture. The use of bulbs with higher wattage than specified will increase temperatures and risk of fire.

**WARNING:** This lamp has a polarized plug (one blade is wider than the other) as a safety feature to reduce the risk of electric shock. This plug will fit in a polarized outlet only one way. If it does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. NEVER use with an extension cord unless the plug can be fully inserted. DO NOT alter the plug.

Do not use detergents when cleaning the fixture. A soft cloth will be suitable for most cleaning. Use window cleaner to clean glass if necessary.

**NOTE:** The important safety precautions and instructions appearing in the manual are not meant to cover all possible conditions and situations that may occur. It must be understood that common sense and caution are necessary factors in the installation and operation of this fixture.

### 3. Installation.

#### No tools required for installation.

Install the LumaCross LED bulb (included). You may also use any other medium base bulb with a max of 60 watts. **DO NOT OVER TIGHTEN BULB.**

**IMPORTANT:** When replacing bulb, please allow bulb and shade to cool down before touching them.

**Note:** This is a touch activated lamp. Light will come on when the base is touched.

Place glass shade over fixture.

Remove preassembled cap from end of power cord and plug power cord into wall outlet.

### Troubleshooting.

**Problem:** Light does not come on.

**Solutions:**

1. Verify that lamp is plugged into outlet and power supply is ON.
2. Verify that bulb is installed correctly.
3. Replace defective bulb with same type of bulb.

**MULTI-STEP DIMMER FUNCTION**  
This lamp is equipped with a touch-control multi-step dimmer. When operated with the LumaCross bulb, the third step (high power) has been limited. This limitation makes the light output in this mode just slightly more than the output in the second step (medium power) mode. **This is not a defect.** This power limiting feature is designed to extend the life of the LumaCross bulb.
